

NEDT

Reconstructing the Data Chain for E-commerce

REGISTER OF TOKEN

WHITEPAPER

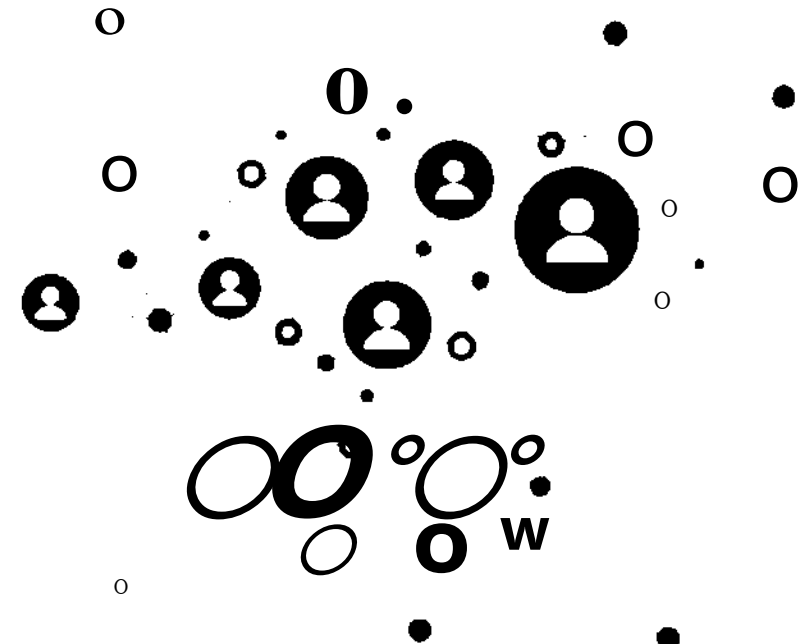

INFO

NEDT is the world's first e-commerce supply chain data ecology based on block chain technology. With advanced data encryption, block chain intelligent contract technical help businesses and consumers to obtain the ownership of the consumption data, the implementation of control and profit businesses, consumers and brands and win-win cooperation.

NEDT Reconstructing the data ecology of e-commerce supply chain.

Simply put, it is to make the data free, safe, convenient, to eliminate inventory and make digital marketing easy.

NEDT will through a distributed, decentralized chain blocks underlying platform, let the ownership of data users (businesses and consumers), and in the case of a fully authorized users, through free, safe, convenient circulation, generating returns and profits.
